

iComfort® S30

Smart
Thermostat

iComfort.

So simple.
So smart.
So comfortable.®

Adapts to your life. Perfectly.

Your schedule may change. The weather may change. Even the air quality in your neighborhood may change. But the iComfort® S30 adapts to help deliver the ultimate in comfort, energy savings and peace of mind.

The iComfort® S30 brings new innovation to energy savings.

THE STANDARD WAY

With a conventional programmable thermostat, you have to set your schedule based on what you think it will be. There's not much room for flexibility or change.

SMART AWAY™ MODE IS AN EASIER WAY

The iComfort S30's Smart Away Mode automatically creates a schedule based on when you leave and when you come home. So you can get an energy-saving schedule without even thinking about it.

Save energy when you're away. But always come home to comfort.

LEAVING YOUR HOUSE

The iComfort S30's Smart Away Mode works with an app on your mobile phone to detect when you're leaving, and automatically puts your system into an energy-saving mode.

RETURNING HOME

If you or a family member returns home, your mobile phone tells the iComfort S30 that you're on the way. Smart Away then returns your system to a normal schedule, welcoming you home with a comfortable environment.

.....
The iComfort S30 can work with multiple phones at the same time, and you can choose how wide you want your virtual boundary area to be.
.....

Adapting to your life in real time.

Schedule IQ™ technology works with Smart Away Mode to help optimize heating and cooling based on the patterns of your family's schedule.

Enter the times you normally go to sleep and wake up, along with the temperatures you'd prefer. The iComfort S30 does the rest.

Should your schedule change, the iComfort S30 will detect that you've left early, using input from your mobile phone. You don't have to make an adjustment to your heating and cooling. The iComfort S30 will do it for you.

Powerful temperature and humidity control.

Comfort is a combination of temperature and humidity. The iComfort® S30 controls both with intuitive precision.

Your environment, your way, with just a touch.

SET IT TO 72, AND IT FEELS LIKE 72

The iComfort S30's Feels Like™ Temperature is similar to the "Feels Like" temperature in a weather report. It takes into account the temperature and humidity to help make your home feel exactly like you want it.

THE PERFECT ENVIRONMENT, ALL YEAR LONG

Set the iComfort S30's Perfect Temp, and your system will heat or cool as needed to preserve your temperature in any weather, year round.

Allergen Defender. Because air quality is a major part of comfort.

40% of kids
and 30% of adults
deal with some form of
respiratory difficulty*

44,000
adults have an asthma
attack every day
in America**

ALLERGY RELIEF EXACTLY WHEN IT'S NEEDED

The iComfort S30's Allergen Defender monitors the air quality and pollen levels of your local zip code and automatically turns the fan on to clean your home's air when outdoor levels are high.

HUMIDITY IN IDEAL BALANCE

Excess humidity can make air feel heavy and uncomfortable, while causing mold growth in your home. Climate IQ® technology monitors humidity levels, and removes excess moisture for healthier, more comfortable air.

Peace of mind is also part of your comfort.

YOUR DEALER CAN ADDRESS MANY PROBLEMS FROM ANYWHERE

The iComfort S30 lets your dealer make remote adjustments to your system from anywhere. This means many problems can be diagnosed and even solved without a service call to your home.

PERFORMANCE REPORTS HELP YOU FINE-TUNE SETTINGS FOR EFFICIENCY

Performance reports give you historical data on your system's operation, including temperature ranges, how long the system runs each day and more. Daily, hourly and monthly reports are available.

THE ICOMFORT S30 GIVES YOU THE ADDED ASSURANCE OF SOLID WARRANTY PROTECTION

The iComfort S30 comes with the security of a 5-year limited warranty, which is among the best in the industry.
